AVAILABLE IN WHITE AND BLACK

RIGHT-ANGLED CORNERS (90°)

Selina shower trays are made from innovative cast marble. Their main component is limestone, which combines with resin to create a unique material. With their minimalist design, Selina shower trays are a standout feature in any bathroom. Available in textured white and textured black.

TAILORED FLEXIBILITY

Selina shower trays can easily be **cut to the exact size required, ensuring a perfect fit** even in unusually shaped spaces. The maximum cutting allowances are specified in the installation instructions. They also offer three installation options – **against a wall, beneath the wall tiles or flush with the floor.** This makes them easy to adapt to the space and the desired look of the bathroom.

EXTRA-FLAT

The exclusive formula allows the creation of **extra-flat** shower trays with heights of 26 mm, 28 mm and 31 mm, that can be installed flush with the floor. The bathroom space gains continuity, without barriers, ensuring elegance and easy access to the shower.

RESISTANCE

Selina shower trays feature a **Gel Coat** surface finish that complies with **EN 14527 – CL1 + CL2** and offer high durability, colour stability, and reduced risk of cracking. They are **highly resistant** to wear caused by chemical agents and to discolouration from natural or artificial light.

EASY CLEANING

Selina shower trays have demonstrated excellent performance in quality tests involving chemical and abrasive products. Maintenance is simple, just **rinse with water.**

NON-SLIP

The textured finish is **non-slip (Class C*),** ensuring maximum safety in the shower while offering a pleasant, natural-stone-like feel to the touch.

***In compliance with DIN 51097.**
