FEATURES

Serie Mio excel by tability to combine nice smooth design with convenience. A bathroom for people with limited mobility requires different space solutions, different shapes and dimensions of furnishings than a regular bathroom. But in terms of atmosphere and appearance, there is no reasonable reason why a bathroom for the disabled should be inferior to a modern design bathroom for healthy users. The JIKA brand program for physically disabled people is a clear proof. The elevated Mio combination pan (480 mm) was designed for handicap users or for elderly and mobility-restricted citizens. Taller people will also appreciate it. Vario outlet permits horizontal, oblique and vertical connections. For the combination pan, it is necessary to order a cistern and a seat with cover Mio. The installation kit is included in the package. We provide an extended warranty of 10 years for JIKA ceramic products.

Comfort height
