

WC FLUXOR system

Operating plate position: Frontal

Suitable for: Wall-hung toilet

Compatible with

H893646 PL8 dual flush plate

H890656 PL3-E, non-contact plate with infrared sensor, stainless steel

The concealed module WC FLUXOR system for wall-hung toilets with self-supporting steel frame is anchored to the floor and rear wall by a dry process and is designed for flushing with pressurized water. A pressure button with the Roca logo is included in the package. It is possible to use a straight connection to the WC module to the module, which replaces the 110/90 elbow and is offered in places where the waste for the module is straight from the wall and not in the floor. The module offers an optimal pressure of 5-6 bar (minimum pressure 3 bar) and a load capacity of 400 kg. This product is suitable for use in public areas. We provide a 10-year warranty on the steel frame and a 5-year warranty on the other parts of the module.
