Dimensions

Length: 500 mm.
Width: 410 mm.
Height: 190 mm.

Compatible with

H819611 Siphon cover

Simple clean lines and softly rounded edges are typical design features of the Deep by JIKA series. The washbasin from the named series has a beautiful simple shape, is spacious thanks to the storage places and the width of 500 mm and is sufficiently deep. The Deep by JIKA washbasin is a practical and elegant solution not only for private bathrooms, but also for public places. The washbasin with batch 134 offers a children's motive of a green horse. Adapt the height of the installed washbasin to the age of the children, the recommended height is 600 mm. It can be combined with a ceramic column or cover. We recommend the Rio G5/4" x DN32 siphon (H3741R0), the Mio 5/4"-32 mm (H374710) or the Mio siphon adjustable from 175 to 270 mm (H894249). We provide an extended warranty of 10 years for JIKA ceramic products.
