

Shower tray, rectangular, steel

Timeless elegance and functionality meet at this Pure shower tray. The shower tray is made from premium steel up to 3 mm thick and available in white or black. Both color variants can be ordered with a special Antislip treatment, which prevents slipping in the shower. Pure shower tray is shallow, so we recommend combining with a siphon H294233 or VS34051C560000. We provide an extended 30-year warranty for Pure steel trays. Made in the European Union.

Antislip type: Added

Depth: Ultraflat (less than 45 mm)

Material: Steel

Shape: Rectangular
