H294817 Automatic overflow with inlet

H294818 Automatic overflow with inlet

H294012 Metal legs for bathtubs Alma, Tanza Plus, Tanza and Riga

Stable shape, resistance to temperature fluctuations, easy cleaning are the main advantages of anatomically shaped baths made of standard steel. The Alma series bathtub with a volume of 180 liters, which is made of premium steel up to 3 mm thick, also belongs to such a group. An Antislip treatment is also available, which prevents slipping in the bathtub. An additional assortment and practical solution are one-piece or two-piece Cubito bathtub screens, which can be used for Alma bathtubs thanks to the straight edge. The non-traditional installation allows you to create a truly luxurious space. 5 year warranty provided. 100% recyclable.
