

### Single lever shower mixer, without shower set, chrome

Application place: Shower  
Faucet type: Single-lever  
Finish: Chrome  
Installation type: Wall-mounted

#### Technical drawings

Mio-N series of bathroom faucets is a popular series due to its elegant shapes and simple lever controls. We recommend combining the wall-mounted lever shower mixer without a shower set with the Cubito-N shower accessory. The battery contains a high-quality ceramic cartridge (Ø 40 mm), which is improved by the OptimEco system, facilitating the control of temperature and water flow, and a non-return valve against the suction of polluted water into drinking water. The chrome surface of the battery and the ceramic cartridge are covered by a 5-year warranty. Tested to 70.000 cycles. Mio-N faucets and shower accessories are assembled and 100% tested at the JIKA factory in Znojmo.
