

### Light HORIZON New, LED, IP 44, 1x6W, 390 lm

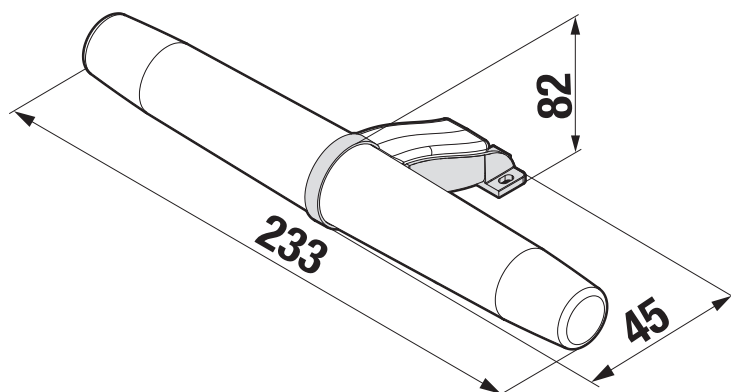

#### Dimensions

Length: 233 mm.

Width: 42 mm.

Height: 85 mm.

#### Technical drawings

Mirrors are an integral and very important part of every bathroom. Thanks to its IP44 safety protection, Horizon New illumination with its special power LED technology can be placed up to 600 mm from the bath-tub. Such illumination will definitely find its place in compact panel-building bathrooms without windows. This type of illumination can be mounted on Clear mirrors, all mirrors glued to a board. Jika mirror lighting units comply with stringent European standards IEC 364-7-701. Installation of the mains cable should be performed by a specialised electrician. A two-year warranty is provided for Jika bathroom lighting.
