

The concealed module WC system Compact with depth 8 cm is designed for wall-hung toilets for back-wall installation. The WC system offers pre-drilled holes in the frame and it's suitable for plasterboard structure installation. The massive steel frames are tested for a load of 400 kg, floor installation, adjustable height. The WC system is insulated against condensation and offers quiet operation of the filling valve, insulated elbow to prevent dewing of the module and water pipes, drain elbow DN 90/90. Up-to-date push-button design is smooth and has a silent operation, flushing options 2/4l, 3/4,5l and 3/6l. We provide a 5-year warranty on concealed modules and free customer service within 5 days!
